

140 Gallon 40kHz Sonic Wave Ultrasonic Cleaner 2 Tanks For DPF PDF

Our Product Introduction

for more products please visit us on skymenultrasonic.com

Basic Information

- Place of Origin: Shenzhen, China
- Brand Name: SkyMen
- Certification: RoHS, CE, FCC, SGS
- Model Number: JP-2108GH
- Minimum Order Quantity: 1
- Price: Negotiation
- Packaging Details: Wooden case
- Delivery Time: In Stock
- Payment Terms: T/T
- Supply Ability: 800 pcs per month

Product Specification

- Model: JP-2108GH
- Tank Volume: 540L
- Ultrasonic Power: 5400W
- Heating Power: 18000W
- Frequency: 40KHz/28KHz
- Internal Tank Size: 1000X900X600mm (L*W*H)
- Filter Cycle System: 1 Set
- Gross Weight: 800KG
- Highlight: 40kHz Sonic Wave Ultrasonic Cleaner,
DPF PDF Sonic Wave Ultrasonic Cleaner,
140 Gallon Ultrasonic Engine Cleaner

PRODUCT SPECIFICATIONS

No		
1	Model	JP-2108GH (Ultrasonic cleaning + Filter+ hot air drying)
2	1st Tank	Function
		Ultrasonic cleaning + Filter+ Hot water cleaning
		Ultrasonic Frequency
		28/40kHz (other frequency can be customized)
		Tank Material
		SUS 304 (SUS 316 can be customized)
		Inner tank dimension
		1000*900*600mm
		Tank Capacity
		540L
		Transducer
		108pcs
		Ultrasonic Power
		5400W
		Heating Power
		18000W
3	2nd tank	Time setting of Ultrasonic
		0~99 hours
		Temperature setting
		Room temperature ~ 95°C adjustable
4	Packing	Thickness of tank
		2mm
		Drain value
		Yes, in the right side of machine
5	Warranty	Water inlet/outlet
		Yes
		Filter
		1 set, connect with 1st tank
6	Certificate	Generator
		1 set
		Lid
		Yes, hinged with machine body, with gasket
7	Production time	Basket load
		300KG
		Function
		Hot air drying tank
8	Packing	Inner tank dimension
		1000*900*600mm
		Turbines power
		750W
9	Warranty	Dryer power
		3000W
		Overall size
		260*170*130cm
10	Certificate	Packing size
		270*180*150cm
		Packing detail
		By wooden case(No logs, free of fumigation)
11	Production time	1 year warranty for spare parts, all life technical support
		CE, RoHS; FCC, REACH
		5 days if there is stock; 20 days if there is no stock

PRODUCT CONFIGURATION

Heating Function

You can adjust the heating water temperature up to 95°C.
It's efficient to remove oil and wax.

Built-in heating tube

◀ Suitable cleaning agent can be added for different cleaning objects

Industrial Transducer

Skymer ultrasonic cleaner all adopt imported transducers,
the quality is more secure.

Low Heat

Strong vibration

Good durability

Stabilized output

External Generator

Adjustable ultrasonic power, strong adaptability of workpiece, high cleaning efficiency and stable performance.

1 Ultrasonic power regulator

2 Main switch

Note: The generator has been tested and debugged before leaving the factory, Please do not debug keys except 1 2 without the guidance of professional technical personnel.

What functions can we make?

PLC

Lifting

Spraying

Condensation

Bubbling

Agitation

Filtration

Drying

Commercial hardware machinery ultrasonic cleaning machines are suitable for cleaning applications such as optics, machinery, auto maintenance, electronics, jewelry, jade, hardware parts, assembly parts, electronic tools, circuit boards, etc. It has a good effect on the slits, grooves, deep holes, blind holes, surface cleaning, degreasing, rust removal, and oxide removal of cleaning objects.

In addition to the working conditions of ultrasonic cleaning application, the power switching T-type is mainly used for cleaning of special equipment in agronomy, food, cosmetics and other industries, as well as extraction and emulsification of ingredients. Machinery industry: removal of anti-rust grease, cleaning of measuring tools, degreasing and derusting of mechanical parts, cleaning of engines, carburetors and auto parts, dredging and cleaning of filters and screens.

Surface treatment industry: degreasing and rust removal before electroplating, cleaning before ion plating, phosphating treatment, carbon deposit removal, oxide scale removal, polishing paste removal, surface activation treatment of metal workpieces.

Instrumentation industry: high cleanliness of precision parts, deep cleaning before assembly.

Electronics industry: cleaning of mechanical and electronic parts such as rosin, solder spots, and high-voltage contacts on printed circuit boards.

Medical industry: cleaning of medical equipment and utensils.

Semiconductor industry: high cleanliness cleaning of semiconductor wafers.

Watch and jewelry industry: cleaning sludge, dust, oxide layer, polishing paste, etc.

Biochemical industry: cleaning and descaling of laboratory utensils; sample pretreatment.

Optical industry: degreasing, sweating and dust removal of optical devices.

Textile printing and dyeing industry: cleaning textile spindles, spinnerets, etc.

Petrochemical industry: cleaning and dredging of metal filter screens, cleaning of chemical containers, exchangers, etc.

Ultrasonic cleaning of other hard workpieces and chemical cleaning agents to improve cleaning efficiency and improve cleanliness.

Working Principle:

The principle of the ultrasonic cleaning machine is mainly to convert the sound energy of the power ultrasonic frequency source into mechanical vibration through the transducer, and to irradiate the ultrasonic wave into the cleaning liquid in the groove through the cleaning tank wall. Due to the radiation of the ultrasonic waves, the microbubbles in the liquid in the tank can be kept vibrated by the action of the sound waves. The adsorption of the dirt and the surface of the cleaning member is destroyed, causing fatigue damage of the dirt layer to be rejected, and the vibration of the gas type bubble scrubs the solid surface.

Cleaning Effect show:
